

Process coordination: Docket 7081 & Docket 7873

Docket
7081
Process

*Project-Specific
Action Plan*

Required by Docket
7081 MOU

Describes process:
Non-generic critical
path from ID to
resolution w/key
milestones &
coordination with
regulators &
stakeholders.

Bulk &
predominantly
bulk system issues
that screen in

Docket 7873 & Distributed Utility Planning Processes

Reliability Plan alternatives analysis

*Analyzes whether cost-effective alternatives
can meet a transmission need or distribution need.*

Required by Docket 7873
Attachment II Screening Framework

Use 7081 MOU process to*:

- ID constraints
- ID preferred T solution, cost & year of need
- NTA screening

Develop least-cost plan to resolve constraint

Define Equivalency

Develop Reliability Plan that IDs combinations of
resources to resolve constraint

Reliability Plan includes Project-Specific Action Plan
(prepared by December following publication of
VELCO Long-Range Plan)

*Reliability plans required for
transmission, sub-transmission
& distribution constraints*

Docket
7081
Process

7081 Milestones

Solution selection

Cost allocation

Implementation plan

Public outreach
processes

*Required
elements of
VELCO
Long-Range
Transmission
Plan

This process is initiated identification of a reliability deficiency, through VELCO Long-Range Transmission Plan, Distribution Utility Integrated Resource Plan, or other process.
